Course Introduction / Overview:

This training course is designed to equip professionals with the strategic insights and practical skills needed to lead corporate social responsibility (CSR) and community engagement initiatives. In today's business world, an organization's role in society is under greater scrutiny than ever before. This program, offered by BIG BEN Training Center, provides a framework for developing and implementing CSR strategies that create shared value for both the business and the community. We will explore how to move beyond simple philanthropy to create meaningful, measurable impact that aligns with your company's core mission. The curriculum is informed by the work of thought leaders like Michael Porter and Mark Kramer, whose article "Creating Shared Value" in the Harvard Business Review introduced a powerful new way of thinking about the relationship between business and society. The course goes beyond public relations to provide a clear, actionable roadmap for building trust, fostering positive relationships with stakeholders, and strengthening your company's social license to operate. We prepare participants to build a business case for these initiatives, lead cross-functional teams, and measure the dual benefits of social impact and business success.
