Excise Duties and Special Taxes Compliance for Manufacturing Sectors Training Course

08 - 12 Nov 2026

Istanbul

4900 € (Per Person)

Ref: #CC6560_210524

Course Introduction / Overview:

This comprehensive training course provides an in-depth exploration of the complex world of excise duties and special taxes as they apply to the manufacturing sector. These taxes, often levied on specific goods like tobacco, alcohol, and carbonated drinks, are a critical source of government revenue and a tool for public policy. For manufacturers, navigating the intricate regulations, calculations, and compliance requirements is essential to avoid costly penalties and operational disruptions. This program is designed to provide professionals with the knowledge and tools needed to ensure full compliance and optimize their tax obligations. We delve into topics such as valuation, classification, and the use of modern tax systems. The course draws on the insights of experts like Professor Vito Tanzi, a distinguished academic in the field of public finance and taxation. His work, including the book Taxation in Developing Countries, provides a solid framework for understanding these tax systems. BIG BEN Training Center has designed this program to empower participants with the ability to manage excise duties effectively, reduce risks, and maintain a competitive edge. Participants will learn how to streamline their tax processes and build robust internal controls.

Target Audience / This training course is suitable for:

- Finance and tax managers in manufacturing.
- Operations and production managers.
- Supply chain and logistics professionals.
- Internal auditors and compliance officers.
- Government officials in tax and customs departments.
- Accountants and financial analysts.
- Business owners and senior executives.
- Legal and regulatory affairs specialists.

Target Sectors and Industries:

- Manufacturing and production.
- Food and beverage industry.
- Tobacco manufacturing.
- Pharmaceuticals.
- Automotive and energy.
- Government and public administration agencies.
- Supply chain and logistics companies.
- Tax and financial consulting services.

Target Organizations Departments:

- Finance and Tax.
- Operations and Production.
- Supply Chain Management.
- Compliance and Internal Audit.
- Legal and Regulatory Affairs.
- Customs and Excise.
- Sales and Marketing.
- Accounting.

Course Offerings:

By the end of this course, the participants will have able to:

- Apply a comprehensive understanding of excise duties and special taxes.
- Calculate and file tax returns for excisable goods.
- Navigate regulatory compliance for various manufacturing sectors.
- Implement effective internal controls and audit procedures.
- Identify and mitigate tax-related risks and penalties.
- Leverage technology for excise tax management.
- Streamline financial and operational processes to ensure full compliance.

Course Methodology:

This course uses a hands-on, problem-solving methodology to ensure participants gain practical, real-world skills in excise tax compliance. The program goes beyond simply explaining regulations; it focuses on their application in the unique context of the manufacturing industry. We use in-depth case studies that are directly relevant to manufacturers, covering everything from complex excise duty calculations to managing tax audits. These cases allow participants to work through intricate scenarios, developing a deeper understanding of tax law and financial management. We also use interactive workshops and group exercises, including simulated tax filing processes. This allows participants to practice filling out crucial documentation and interacting with tax authorities. The curriculum is designed to be highly engaging, encouraging participants to share their own experiences and challenges. BIG BEN Training Center is committed to providing a learning environment where professionals can gain both technical knowledge and strategic insight. Our approach is focused on equipping participants to solve real-world problems and improve their company's operational and financial efficiency.

Course Agenda (Course Units):

Unit One: Foundations of Excise Duties and Special Taxes

- The purpose and scope of excise taxes.
- Key terms and definitions.
- International and local regulatory frameworks.
- Excise tax classification and valuation.
- Understanding the taxable event and tax base.
- Exemptions and reliefs from excise duties.
- Case study: a new product's excise tax liability.

Unit Two: Compliance and Operational Management

- Registration and licensing requirements.
- Tax return preparation and filing.
- Record-keeping and documentation standards.
- Managing bonded warehouses and special customs procedures.
- Handling inter-state and international tax compliance.
- The role of financial technology in tax management.
- Best practices for operational tax compliance.

Unit Three: Risk Assessment and Auditing

- Identifying and assessing tax-related risks.
- Developing a risk management framework.
- Preparing for government tax audits.
- Common audit triggers and red flags.
- Responding to audit queries and appeals.
- Tax penalties and how to avoid them.
- Using internal audits to strengthen compliance.

Unit Four: Sector-Specific Applications

- Excise duties in the food and beverage industry.
- Special taxes on tobacco and related products.
- Carbon taxes and environmental taxes.
- Taxes on luxury goods and services.
- Understanding value-added tax (VAT) in the context of excise duties.
- Case studies on sector-specific compliance.
- Legal frameworks and their implications.

Unit Five: Future Trends and Strategic Planning

- The impact of digital taxation on excise duties.
- The future of automated tax compliance.
- Developing a long-term tax strategy.
- Navigating new regulatory changes.
- Analyzing the role of excise tax in public policy.
- Final project: a comprehensive tax compliance plan.
- Q&A on key challenges and opportunities.

FAQ:

Qualifications required for registering to this course?

There are no requirements.

How long is each daily session, and what is the total number of training hours for the course?

This training course spans five days, with daily sessions ranging between 4 to 5 hours, including breaks and interactive activities, bringing the total duration to 20 - 25 training hours.

Something to think about:

Given the dynamic nature of tax laws, how can a manufacturing company create a proactive and agile compliance framework that anticipates regulatory changes rather than just reacting to them?

What unique qualities does this course offer compared to other courses?

This training course is distinguished by its practical and highly specific focus on excise duties and special taxes within the manufacturing sector. Unlike general tax courses, our program provides a deep dive into the unique challenges and compliance requirements faced by manufacturers of excisable goods. We do not just teach theory; we use hands-on, realistic case studies and simulations that reflect the intricacies of tax management and regulatory compliance. Our methodology is designed to build practical skills in tax calculation, documentation, and risk mitigation. We also provide a forward-looking perspective, exploring how new technologies like digital taxation are changing the landscape. This blend of in-depth knowledge and practical, real-world application ensures participants are well-equipped to manage the complexities of excise taxes, reduce risks, and drive tangible business benefits.
