Strategic Procurement Law and Supply Chain Resilience Training Course

28 Dec 2026 - 01 Jan 2027

Munich

5100 € (Per Person)

Ref: #LAW1156_154872

Course Introduction / Overview:

In today's interconnected and volatile global economy, the intersection of procurement law and supply chain management has become a critical nexus for organizational success and survival. This advanced training course is meticulously designed to navigate this complex landscape, providing a comprehensive framework for mitigating risks and building resilient supply chains. The curriculum moves beyond traditional procurement practices to address the multifaceted legal challenges and operational vulnerabilities that define modern commerce. Drawing upon principles discussed by leading thinkers like Dr. John Gattorna in his work on dynamic supply chain alignment, this program emphasizes a proactive, strategic approach. Participants will explore the legal intricacies of international trade, contract management, and regulatory compliance, while simultaneously learning to identify, assess, and neutralize threats ranging from geopolitical instability to cyber-attacks. BIG BEN Training Center has developed this course to empower professionals with the dual expertise required to not only protect their organizations from liability but also to transform their supply chain into a source of sustainable competitive advantage, a theme also explored in books like "Supply Chain Risk Management: An Emerging Discipline". This is an essential journey from reactive problem-solving to proactive strategic resilience.

Target Audience / This training course is suitable for:

- Procurement and Sourcing Managers.
- Supply Chain Directors and Planners.
- Legal Counsel and Corporate Lawyers.
- Contract Administrators and Managers.
- Compliance and Risk Management Officers.
- Operations and Logistics Managers.
- Finance Professionals involved in procurement decisions.
- Senior Executives and Business Owners.
- Government Officials in procurement and regulation.
- Project Managers overseeing large-scale acquisitions.

Target Sectors and Industries:

- Manufacturing and Industrial Production.
- Logistics, Transportation, and Freight Forwarding.
- Retail and Consumer Goods.
- Pharmaceuticals and Healthcare.
- Technology and Telecommunications.
- Energy, Oil, and Gas.
- Construction and Engineering.
- Aerospace and Defense.
- Financial Services and Banking.
- Governmental agencies and public sector organizations.

Target Organizations Departments:

- Procurement and Purchasing Department.
- Legal and Corporate Affairs Department.
- Supply Chain Management Department.
- Logistics and Distribution Department.
- Risk Management and Compliance Department.
- Operations Management Department.
- Finance and Accounts Department.
- Internal Audit Department.
- Project Management Office.
- Strategic Planning Department.

Course Offerings:

By the end of this course, the participants will have able to:

- Analyze the legal frameworks governing domestic and international procurement.
- Draft and negotiate robust contracts that mitigate supply chain risks.
- Develop a comprehensive supply chain risk identification and assessment matrix.
- Implement effective risk mitigation and contingency planning strategies.
- Ensure procurement activities comply with anti-corruption and ethical sourcing laws.
- Manage supplier relationships and performance from a legal and risk perspective.
- Navigate the complexities of force majeure, contract frustration, and dispute resolution.
- Evaluate and address cybersecurity and data privacy risks within the supply chain.
- Integrate sustainability and ESG criteria into procurement law and strategy.
- Build a resilient and agile supply chain capable of withstanding major disruptions.

Course Methodology:

The training methodology at BIG BEN Training Center is designed to be immersive, practical, and highly interactive, ensuring that participants can immediately apply their learning in a professional context. We move beyond traditional lecture-based formats to a more dynamic learning environment. The course heavily relies on the analysis of real-world case studies, examining recent supply chain disruptions and their legal ramifications to draw out actionable lessons. Participants will engage in collaborative workshops and group exercises, such as developing risk assessment frameworks for hypothetical scenarios and simulating contract negotiations to manage liability. Interactive sessions, expert-led discussions, and peer-to-peer knowledge sharing are central to the learning process. Our approach encourages critical thinking and problem-solving, providing a platform for participants to discuss their unique organizational challenges. Continuous feedback is provided by the instructor to refine understanding and build confidence. This hands-on, engaging methodology ensures a deep and lasting comprehension of complex legal and risk management principles, empowering attendees to drive meaningful change within their organizations.

Course Agenda (Course Units):

Unit One: The Legal Foundation of Modern Procurement

- The intersection of procurement, contract law, and supply chain management.
- Key legal principles in the procurement cycle from sourcing to settlement.
- Understanding the Uniform Commercial Code (UCC) and its international equivalents.
- Public procurement regulations versus private sector legal frameworks.
- Jurisdictional challenges in global sourcing and international trade law.
- The legal implications of different procurement methods (e.g., tenders, auctions).
- Ethical considerations and anti-corruption legislation in procurement.

Unit Two: Advanced Contract Law for Procurement Professionals

- Essential elements of a legally enforceable procurement contract.
- Drafting clear and unambiguous statements of work, specifications, and acceptance criteria.
- Mastering key clauses: indemnification, limitation of liability, and warranties.
- Negotiating and managing intellectual property rights in supplier contracts.
- Understanding and applying force majeure and material adverse change clauses.
- Legal strategies for managing contract variations and change orders.
- Framework agreements and their role in long-term supplier relationships.

Unit Three: Identifying and Assessing Supply Chain Risks

- A comprehensive framework for supply chain risk categorization.
- Techniques for mapping the end-to-end supply chain to identify vulnerabilities.
- Conducting supplier due diligence and financial stability assessments.
- Analyzing geopolitical, economic, and environmental risks.
- Evaluating operational risks including logistics, quality, and capacity failures.
- Assessing cybersecurity threats and data breach risks in the digital supply chain.
- Utilizing risk assessment matrices and heat maps for prioritization.

Unit Four: Strategic Risk Mitigation and Compliance

- Developing a proactive supply chain risk mitigation and response plan.
- The role of insurance and alternative risk transfer mechanisms.
- Strategies for building supply chain redundancy and flexibility.
- Implementing robust compliance programs for trade sanctions and export controls.
- Navigating modern slavery acts and human rights regulations in sourcing.
- Creating a supplier code of conduct and audit program.
- Business continuity and disaster recovery planning for critical suppliers.

Unit Five: Dispute Resolution and Future-Proofing the Supply Chain

- Early-stage dispute resolution techniques and escalation procedures.
- Understanding mediation, arbitration, and litigation in procurement disputes.
- Managing contract termination for cause and for convenience.
- The impact of technology (AI, Blockchain) on procurement law and risk.
- Integrating Environmental, Social, and Governance (ESG) criteria into legal frameworks.
- Building a culture of risk awareness across the organization.
- Capstone exercise: developing a holistic legal and resilience strategy for a complex supply chain.

FAQ:

Qualifications required for registering to this course?

There are no requirements.

How long is each daily session, and what is the total number of training hours for the course?

This training course spans five days, with daily sessions ranging between 4 to 5 hours, including breaks and interactive activities, bringing the total duration to 20 - 25 training hours.

Something to think about:

In an era of increasing geopolitical instability and protectionism, how can procurement law evolve from a tool of compliance to a strategic enabler of supply chain resilience?

What unique qualities does this course offer compared to other courses?

This course distinguishes itself by holistically integrating the traditionally separate disciplines of procurement law and supply chain risk management into a single, cohesive strategic framework. While many programs focus on either the legal mechanics of contracting or the operational aspects of risk, this training course is built on the premise that in the modern economy, one cannot be effectively managed without a deep understanding of the other. It moves beyond theoretical legal principles to provide a practical, actionable toolkit for navigating contemporary challenges that are often overlooked, such as the legal ramifications of cybersecurity breaches within a supplier's network, the contractual complexities of implementing sustainable and ethical sourcing standards, and the navigation of volatile geopolitical landscapes. The curriculum is uniquely forward-looking, dedicating significant attention to the impact of emerging technologies like AI and blockchain on contractual obligations and risk profiles. By focusing on building strategic resilience rather than just ensuring compliance, the course equips participants with the advanced skills to not only protect their organizations but to create a supply chain that is a durable competitive asset.
