

ADVANCED LAST-MILE DELIVERY AND FULFILLMENT STRATEGIES TRAINING COURSE

02 - 06 Nov 2026

TOKYO

5800 € (PER PERSON)

REF: #LOG1659_150583

COURSE INTRODUCTION / OVERVIEW:

The final stage of the delivery process, the last mile, is arguably the most critical and complex component of the modern e-commerce supply chain. It directly impacts customer satisfaction, brand loyalty, and operational costs. This intensive training course is meticulously designed to equip professionals with the advanced strategies and operational knowledge required to master last-mile delivery and e-commerce fulfillment. We will delve into the intricate challenges of urban logistics, rising customer expectations for speed and transparency, and the imperative for sustainable practices. Drawing on insights from leading academics like Dr. Alan McKinnon, a prominent authority in logistics and supply chain management, and concepts discussed in works such as "Decarbonizing Logistics: Distributing Goods in a Low Carbon World," this program moves beyond theoretical frameworks. At BIG BEN Training Center, we provide a practical, hands-on approach to designing, implementing, and optimizing fulfillment operations. Participants will explore cutting-edge technologies, innovative delivery models, and data-driven decision-making processes to build a resilient, efficient, and customer-centric last-mile ecosystem that drives competitive advantage and profitability in the digital marketplace. This course is the definitive guide for navigating the future of e-commerce logistics.

TARGET AUDIENCE / THIS TRAINING COURSE IS SUITABLE FOR:

- Logistics and Supply Chain Managers.
- E-commerce Operations Managers.
- Warehouse and Fulfillment Center Supervisors.
- Transportation and Fleet Managers.
- Operations Analysts and Planners.
- Retail Store Managers involved in omnichannel fulfillment.
- Last-Mile Delivery Service Providers.
- Entrepreneurs in the e-commerce sector.
- Customer Experience Managers.
- Procurement and Sourcing Professionals.

TARGET SECTORS AND INDUSTRIES:

- E-commerce and Online Retail.
- Third-Party Logistics (3PL) and Fourth-Party Logistics (4PL) Providers.
- Courier, Express, and Parcel (CEP) Services.
- Grocery and Food Delivery Services.
- Pharmaceutical and Healthcare Distribution.
- Fast-Moving Consumer Goods (FMCG).
- Apparel and Fashion Retail.
- Electronics and High-Tech Goods.
- Governmental bodies and public sector postal services.

TARGET ORGANIZATIONS DEPARTMENTS:

- Supply Chain Management.
- Logistics and Distribution.
- Operations Management.
- E-commerce and Digital Strategy.
- Warehouse and Inventory Management.
- Transportation and Fleet Operations.
- Customer Service and Support.
- Strategic Planning and Business Development.
- Information Technology (IT) supporting logistics systems.

COURSE OFFERINGS:

By the end of this course, the participants will have able to:

- Design and evaluate various last-mile delivery network models.
- Implement cost-reduction strategies without compromising service quality.
- Leverage technology for route optimization, real-time tracking, and delivery automation.
- Enhance the customer delivery experience to build brand loyalty.
- Develop and manage an efficient reverse logistics and returns process.
- Analyze key performance indicators (KPIs) to measure and improve fulfillment efficiency.
- Integrate sustainable and green logistics practices into last-mile operations.
- Forecast demand and plan capacity for peak seasons and promotions.
- Mitigate risks associated with urban logistics and delivery disruptions.
- Strategize for future trends, including autonomous vehicles and predictive analytics.

COURSE METHODOLOGY:

The training methodology at BIG BEN Training Center is designed to be highly interactive, engaging, and practical, ensuring that participants can immediately apply their learning to real-world challenges. This course moves beyond traditional lectures, employing a blended learning approach that includes expert-led presentations, in-depth case study analyses of leading e-commerce companies, and collaborative group workshops. Participants will engage in simulation exercises that challenge them to design delivery networks, optimize routes, and manage fulfillment costs. Interactive sessions will encourage peer-to-peer learning and the sharing of diverse industry experiences. We emphasize a hands-on approach, where participants will work with data sets to analyze performance and make strategic decisions. Continuous feedback from the instructor and peers is a core component, fostering a dynamic and supportive learning environment. The program is structured to bridge the gap between theoretical knowledge and operational excellence, equipping attendees with the confidence and skills to transform their organization's last-mile and fulfillment capabilities.

COURSE AGENDA (COURSE UNITS):

• UNIT ONE FOUNDATIONS OF MODERN E-COMMERCE FULFILLMENT

- The strategic importance of the last mile in the customer journey.
- Key challenges in last-mile logistics: cost, speed, and complexity.
- Understanding the end-to-end e-commerce fulfillment cycle.
- Core components of a fulfillment center: receiving, storing, picking, packing, and shipping.
- Key Performance Indicators (KPIs) for measuring fulfillment success.
- The impact of omnichannel strategies on logistics operations.
- Mapping the flow of goods and information in the supply chain.

UNIT TWO LAST-MILE DELIVERY MODELS AND NETWORK DESIGN

- Comparing in-house fleets, 3PLs, and crowdsourced delivery models.
- Designing hub-and-spoke versus decentralized fulfillment networks.
- The role of micro-fulfillment centers (MFCs) and dark stores in urban logistics.
- Strategies for click-and-collect and Buy Online, Pick-up In Store (BOPIS).
- Route planning and dynamic optimization principles.
- Carrier selection and multi-carrier management strategies.
- Network modeling for scalability and resilience.

UNIT THREE TECHNOLOGY AND AUTOMATION IN LOGISTICS

- The role of Warehouse Management Systems (WMS) in fulfillment.
- Leveraging Transportation Management Systems (TMS) for the last mile.
- Real-time visibility platforms and GPS tracking for customer transparency.
- Automation in the warehouse: robotics, automated guided vehicles (AGVs), and sortation systems.
- The application of AI and machine learning for demand forecasting.
- Exploring drone and autonomous vehicle delivery technologies.
- Implementing effective Order Management Systems (OMS) for seamless operations.

UNIT FOUR THE CUSTOMER EXPERIENCE AND REVERSE LOGISTICS

- Managing customer communications and delivery notifications.
- Offering flexible delivery options: time slots, alternative locations, and rescheduling.
- Handling delivery exceptions and service recovery strategies.
- The strategic importance of an efficient returns process (reverse logistics).
- Designing a customer-friendly and cost-effective returns policy.
- Processing, sorting, and disposition of returned goods.
- Using returns data to improve product quality and reduce future returns.

UNIT FIVE COST MANAGEMENT, SUSTAINABILITY, AND FUTURE TRENDS

- Conducting a cost-to-serve analysis for last-mile deliveries.
- Strategies for fuel efficiency and fleet maintenance cost reduction.
- Implementing green logistics: electric vehicles, sustainable packaging, and carbon footprint reduction.
- Preparing for peak season: capacity planning and resource allocation.
- The impact of the gig economy on delivery services.
- Predictive analytics for anticipating delivery disruptions.
- The future of fulfillment: hyper-personalization and instant delivery.

FAQ:

QUALIFICATIONS REQUIRED FOR REGISTERING TO THIS COURSE?

There are no requirements.

HOW LONG IS EACH DAILY SESSION, AND WHAT IS THE TOTAL NUMBER OF TRAINING HOURS FOR THE COURSE?

This training course spans five days, with daily sessions ranging between 4 to 5 hours, including breaks and interactive activities, bringing the total duration to 20 - 25 training hours.

SOMETHING TO THINK ABOUT:

As automation and AI reshape last-mile logistics, how can organizations balance technological efficiency with the human element of customer service and workforce management?

WHAT UNIQUE QUALITIES DOES THIS COURSE OFFER COMPARED TO OTHER COURSES?

This training course distinguishes itself through its holistic and forward-looking approach to a highly dynamic field. While many programs focus narrowly on either warehouse operations or transportation, this course integrates both into a single, cohesive strategy centered on the end customer experience. We move beyond conventional logistics management to explore the critical intersection of technology, sustainability, and profitability. The curriculum is uniquely structured to address not just current best practices but also to prepare participants for the future of fulfillment, with dedicated modules on AI, automation, and green logistics. Unlike purely theoretical courses, our methodology emphasizes practical application through real-world case studies, simulations, and data analysis exercises. Participants will not only learn the "what" and "why" but also the "how" of implementing advanced fulfillment strategies. The course fosters a deep, strategic understanding, enabling leaders to build a last-mile operation that is not just a cost center, but a powerful driver of competitive advantage, customer loyalty, and sustainable growth in the demanding e-commerce landscape.
