Strategic Competitive Intelligence and Market Analysis Training Course

21 - 25 Dec 2026

LONDON

5900 € (Per Person)

Ref: #PLA2447_126810

Course Introduction / Overview:

In today's hyper-competitive global marketplace, the ability to anticipate market shifts and competitor moves is no longer a luxury but a strategic necessity. This course provides a comprehensive framework for developing and implementing a robust competitive intelligence (CI) program that directly informs and shapes winning market strategies. Moving beyond basic competitor profiling, this program delves into the sophisticated analytical techniques required to transform raw data into actionable strategic foresight. As the renowned strategist Michael E. Porter outlined in his seminal work, "Competitive Strategy: Techniques for Analyzing Industries and Competitors," understanding the underlying structure of an industry is key to superior performance. This training course, offered by BIG BEN Training Center, is meticulously designed to equip professionals with the tools and mindset to master this discipline. Participants will learn to navigate the complete intelligence cycle, from defining key intelligence needs to ethically gathering and analyzing information, and ultimately, to communicating insights that drive decisive and effective strategic action, ensuring their organization maintains a sustainable competitive advantage.

Target Audience / This training course is suitable for:

- Strategic Planners and Strategy Managers.
- Market Research Analysts and Business Analysts.
- Competitive Intelligence Professionals.
- Business Development Managers and Executives.
- Product Managers and Marketing Directors.
- Corporate Executives and Senior Leadership (CEOs, CSOs, CMOs).
- Entrepreneurs and Business Owners.
- Management Consultants.

Target Sectors and Industries:

- Technology and Software Development.
- Pharmaceuticals and Healthcare.
- Financial Services, Banking, and Insurance.
- Fast-Moving Consumer Goods (FMCG) and Retail.
- Telecommunications and Media.
- Manufacturing and Engineering.
- Energy and Utilities.
- Government Agencies and Public Sector Organizations.

Target Organizations Departments:

- Strategic Planning and Corporate Strategy.
- Marketing and Sales.
- Business Development and Mergers & Acquisitions.
- Product Management and Development.
- Research and Development (R&D).
- Executive Management.
- Market Research.

Course Offerings:

By the end of this course, the participants will have able to:

- Master the complete competitive intelligence cycle from planning to dissemination.
- Apply advanced analytical frameworks like Porter's Five Forces, SWOT, and PESTLE analysis.
- Conduct thorough competitor profiling and benchmarking to identify vulnerabilities and opportunities.
- Develop ethical and effective techniques for primary and secondary data collection.
- Utilize digital tools for monitoring online competitor activities and market trends.
- Translate complex data sets into clear, actionable strategic insights for decision-makers.
- Develop robust market entry, growth, and product positioning strategies.
- Facilitate strategic planning sessions and war gaming exercises.
- Communicate intelligence findings persuasively to senior leadership.
- Build and manage a proactive competitive intelligence function within their organization.

Course Methodology:

The training methodology at BIG BEN Training Center is designed to be highly interactive, practical, and immersive, ensuring that participants can immediately apply their learning in a real-world context. We move beyond traditional lectures to foster a dynamic learning environment built on a blend of expert-led instruction, intensive case study analysis of leading global companies, and collaborative group workshops. Participants will engage in hands-on exercises, including competitive landscape mapping and scenario planning simulations, which challenge them to solve complex strategic problems. Team-based activities are central to the course, encouraging peer-to-peer learning and the exchange of diverse industry perspectives. Continuous feedback is provided by the instructor to guide learning and refine analytical skills. The course emphasizes a practical, results-oriented approach, equipping attendees not just with theoretical knowledge but with the tangible skills and confidence to build and execute powerful competitive intelligence and market strategies that deliver a measurable impact on business performance.

Course Agenda (Course Units):

Unit One: Foundations of Competitive Intelligence and Strategy

- Introduction to Competitive Intelligence (CI).
- The strategic importance of CI in modern business.
- The complete CI cycle: planning, collection, analysis, and dissemination.
- Distinguishing between data, information, and intelligence.
- Ethical and legal considerations in intelligence gathering.
- Aligning CI with corporate strategy and objectives.
- Identifying Key Intelligence Topics (KITs) and Key Intelligence Questions (KIQs).

Unit Two: Intelligence Collection and Source Management

- Primary and secondary intelligence sources.
- Advanced online and database research techniques.
- Leveraging social media and digital channels for intelligence.
- Introduction to Human Intelligence (HUMINT) techniques.
- Evaluating the reliability and validity of sources.
- Organizing and managing collected information.
- Introduction to tools for data collection and monitoring.

Unit three: Analytical Frameworks for Market and Competitor Assessment

- SWOT and TOWS Matrix for strategic formulation.
- PESTLE analysis for understanding the macro-environment.
- Deep dive into Porter’s Five Forces for industry analysis.
- Value Chain Analysis to identify competitive advantages.
- Competitor profiling and capability assessment.
- Strategic Group Analysis and market mapping.
- Financial analysis of competitors for strategic clues.

Unit Four: From Analysis to Actionable Strategic Insight

- Synthesizing data from multiple sources to identify patterns.
- Techniques for forecasting competitor moves and market shifts.
- Introduction to scenario planning and analysis.
- Conducting competitive benchmarking effectively.
- War gaming and business simulation exercises.
- Identifying market opportunities, threats, and blind spots.
- Developing early warning systems for strategic threats.

Unit Five: Developing and Implementing Market Strategy

- Translating intelligence into go-to-market strategies.
- Crafting competitive product positioning and differentiation strategies.
- Using intelligence to inform pricing and promotion decisions.
- Communicating intelligence insights to senior management and stakeholders.
- Building a business case for strategic initiatives based on CI.
- Measuring the ROI and impact of the CI function.
- Creating a culture of competitive awareness within the organization.

FAQ:

Qualifications required for registering to this course?

There are no requirements.

How long is each daily session, and what is the total number of training hours for the course?

This training course spans five days, with daily sessions ranging between 4 to 5 hours, including breaks and interactive activities, bringing the total duration to 20 - 25 training hours.

Something to think about:

In an era of rapid technological disruption and data overload, how can an organization balance the pursuit of competitive intelligence with the ethical imperative of data privacy and corporate responsibility?

What unique qualities does this course offer compared to other courses?

This course distinguishes itself by focusing intensely on the critical link between analysis and actionable strategy, a gap often left unaddressed in purely theoretical programs. While many courses teach analytical frameworks, our curriculum is uniquely structured to guide participants through the entire process of transforming raw data into concrete, defensible strategic recommendations that drive business growth. We emphasize a dual approach, blending timeless strategic principles, such as those pioneered by Michael E. Porter, with cutting-edge digital intelligence techniques relevant to today's online ecosystem. The program's methodology is built around practical application, featuring immersive war gaming simulations and real-world case studies that compel participants to make strategic decisions under pressure. Furthermore, a significant portion of the course is dedicated to the ethical dimensions of intelligence gathering and the crucial skill of communicating insights to executive leadership, ensuring that the intelligence function earns trust and becomes an indispensable part of the strategic decision-making process. This holistic approach ensures graduates leave not just as analysts, but as strategic thinkers capable of shaping their organization's future.
