

DRIVING PROJECT PRODUCTIVITY WITH AGILE WORKFLOW IMPLEMENTATION TRAINING COURSE

08 - 12 Nov 2026

AMMAN

3800 € (PER PERSON)

REF: #PRO4047_202700

Course Introduction / Overview:

This comprehensive training course, "Driving Project Productivity with Agile Workflow Implementation Training Course," offered by BIG BEN Training Center, is meticulously designed to equip professionals with the essential knowledge and practical skills required to significantly enhance project productivity and implement robust Agile workflows within their organizations. In today's dynamic business landscape, the ability to adapt quickly and deliver value efficiently is paramount. This course delves into the core principles of Agile methodologies, providing a clear roadmap for achieving project delivery acceleration and fostering continuous improvement. Participants will explore advanced strategies for workflow efficiency training, learning how to streamline project processes and optimize team productivity agile practices. We will examine the insights of prominent thinkers in the field, such as Mary Poppendieck, whose work on "Lean Software Development: An Agile Toolkit for Software Development Managers" provides a foundational understanding of lean principles crucial for effective Agile transformation. This program goes beyond theoretical concepts, focusing on strategic agile implementation and practical application of frameworks like Scrum and Kanban to drive tangible results. By mastering adaptive project planning and agile leadership development, attendees will be empowered to cultivate an agile mindset, leading to sustainable agile practices and superior project outcomes. This course is an investment in developing organizational agility and ensuring project success factors are consistently met.

Target Audience / This training course is suitable for:

- Project Managers.
- Program Managers.
- Team Leaders.
- Scrum Masters.
- Product Owners.
- Business Analysts.
- Operations Managers.
- IT Professionals.
- Department Heads.
- Anyone involved in project delivery and workflow improvement.

Target Sectors and Industries:

- Information Technology and Software Development.
- Financial Services and Banking.
- Healthcare and Pharmaceuticals.
- Telecommunications.
- Manufacturing and Engineering.
- Retail and E-commerce.
- Consulting Services.
- Government Agencies and Public Sector Organizations.
- Education and Training.
- Media and Entertainment.

Target Organizations Departments:

- Project Management Offices (PMO).
- Product Development.
- Information Technology (IT).
- Operations.
- Research and Development (R&D).
- Business Transformation.
- Strategy and Planning.
- Human Resources (HR) for talent development.
- Quality Assurance.
- Marketing and Sales for agile campaigns.

Course Offerings:

By the end of this course, the participants will have able to:

- Implement core Agile methodologies, including Scrum and Kanban, to enhance project delivery acceleration.
- Optimize project productivity drivers through effective workflow efficiency training and lean agile workflow optimization.

- Develop and execute an agile transformation roadmap tailored to their organizational needs.
- Master adaptive project planning and forecasting techniques for dynamic environments.
- Facilitate continuous improvement agile practices through effective retrospectives and feedback loops.
- Apply agile leadership development principles to foster high-performing, self-organizing teams.
- Utilize value stream mapping agile techniques to identify and eliminate process bottlenecks.
- Integrate risk management in agile projects to mitigate potential challenges effectively.
- Enhance stakeholder engagement agile communication strategies for improved project outcomes.
- Cultivate an agile mindset and promote sustainable agile practices within their teams and organizations.
- Measure and report on agile metrics and performance to demonstrate value delivery.
- Strategically implement agile tools and software for seamless project management.
- Drive organizational agility and business agility transformation.
- Improve remote agile team collaboration and communication.
- Address agile change management challenges with proven strategies.

Course Methodology:

BIG BEN Training Center employs a highly interactive and practical training methodology for "Driving Project Productivity with Agile Workflow Implementation Training Course," designed to ensure maximum participant engagement and knowledge retention. The approach combines theoretical foundations with extensive hands-on application, fostering a deep understanding of agile project management best practices and workflow efficiency training. Participants will engage in dynamic group discussions, allowing for the sharing of diverse perspectives and real-world challenges related to improving team productivity agile. A significant portion of the course is dedicated to case studies, where attendees will analyze complex scenarios and apply learned agile principles to develop practical solutions, simulating real-world project delivery acceleration. Teamwork exercises will encourage collaborative problem-solving and the practical application of scrum framework implementation strategies and kanban for project productivity. Interactive sessions, including simulations and role-playing, will provide opportunities to practice agile leadership development and stakeholder engagement agile techniques in a safe, supportive environment. Continuous feedback mechanisms are integrated throughout the course, allowing instructors to tailor content and address specific learning needs, ensuring that every participant gains actionable insights for their agile transformation roadmap. This immersive methodology guarantees that participants not only grasp the concepts but also master the skills necessary for strategic agile implementation and fostering organizational agility.

Course Agenda (Course Units):

Unit One: Foundations of Project Productivity and Agile Principles

- Understanding project productivity drivers and their impact on organizational success.
- Introduction to Agile methodologies, values, and the Agile Manifesto.
- Exploring key Agile principles for adaptive project planning and execution.
- Comparing traditional waterfall approaches with modern Agile project management.
- Identifying the core benefits of Agile for enhancing project delivery acceleration.
- Defining essential Agile roles and responsibilities within a project team.
- Strategies for effectively setting up and initiating an Agile project environment.

Unit Two: Core Agile Frameworks and Practices

- A deep dive into the Scrum framework, including roles, events, and artifacts.
- Implementing Kanban for visual workflow management and continuous flow.
- Applying Lean principles for waste reduction and value stream mapping agile.
- Crafting effective user stories and managing the product backlog efficiently.
- Mastering sprint planning and execution for predictable delivery.
- Facilitating daily stand-ups for improved team communication and synchronization.
- Conducting effective retrospectives for continuous improvement agile practices.

Unit Three: Enhancing Workflow Efficiency and Collaboration

- Techniques for value stream mapping to identify and optimize project workflows.
- Strategies for identifying and eliminating bottlenecks in the project delivery pipeline.
- Methods for improving team collaboration and fostering a cohesive Agile culture.
- Best practices for facilitating effective Agile meetings and decision-making.
- Overview of essential agile tools and software for project management.
- Implementing remote agile team collaboration strategies for distributed teams.
- Building a culture of transparency, trust, and psychological safety within Agile teams.

Unit Four: Scaling Agile and Advanced Productivity Techniques

- Introduction to scaling Agile frameworks such as SAFe, LeSS, and Scrum@Scale.
- Utilizing agile metrics and reporting for performance measurement and insights.
- Effective risk management in agile projects and proactive mitigation strategies.
- Advanced adaptive planning and forecasting techniques for complex projects.
- Integrating DevOps principles with Agile workflows for continuous delivery.
- Developing agile leadership and coaching skills for empowering teams.
- Strategies for sustaining Agile transformation and continuous organizational growth.

Unit Five: Strategic Implementation and Organizational Agility

- Developing a comprehensive agile implementation roadmap for organizational adoption.
- Addressing and overcoming common Agile adoption challenges and resistance.
- Implementing effective change management in Agile transitions.
- Measuring the tangible impact of Agile on business outcomes and ROI.
- Fostering a culture of organizational agility and business agility transformation.
- Promoting continuous learning and innovation within Agile environments.
- Exploring future trends in project productivity and Agile methodology.

FAQ:

Qualifications required for registering to this course?

There are no requirements.

How long is each daily session, and what is the total number of training hours for the course?

This training course spans five days, with daily sessions ranging between 4 to 5 hours, including breaks and interactive activities, bringing the total duration to 20 - 25 training hours.

Something to think about:

How can organizations effectively balance the need for predictable project outcomes with the inherent adaptability and emergent nature of Agile workflow implementation?

What unique qualities does this course offer compared to other courses?

This "Driving Project Productivity with Agile Workflow Implementation Training Course" distinguishes itself through its holistic and deeply practical approach, moving beyond mere theoretical explanations of Agile frameworks. Unlike many courses that focus heavily on specific tools, BIG BEN Training Center emphasizes the underlying principles and strategic application of Agile to genuinely enhance project productivity drivers and foster organizational agility. We integrate advanced concepts like value stream mapping agile and lean agile workflow optimization, providing participants with a comprehensive toolkit for sustainable agile practices. The curriculum is designed to address real-world challenges, offering insights into effective agile change management and strategies for overcoming common implementation hurdles. Our focus on agile leadership development and cultivating an agile mindset empowers participants to become catalysts for change within their organizations, driving project delivery acceleration and continuous improvement agile. This course provides a robust framework for measuring the impact of Agile on business outcomes, ensuring that participants can articulate and demonstrate the tangible value of their Agile transformation roadmap. It is an academically rigorous yet practically oriented program, equipping professionals with the critical thinking and problem-solving skills needed to navigate complex project environments and achieve superior results
