Strategic R&D and Innovation Leadership Training Course

26 - 30 Oct 2026

Kuala Lumpur

5200 € (Per Person)

Ref: #RD6774_139549

Course Introduction / Overview:

This intensive training course is designed to equip current and aspiring leaders with the strategic skills required to direct high-impact Research & Development and innovation initiatives. In today's hyper-competitive landscape, effective R&D leadership is not merely about managing projects but about architecting the future of the organization. This program moves beyond traditional management techniques to instill a mindset of strategic foresight, enabling participants to build and lead agile, creative, and commercially-savvy R&D teams. We will explore the complete innovation lifecycle, from ideation and portfolio management to intellectual property strategy and market launch. Drawing on seminal concepts from thought leaders like Henry Chesbrough, particularly his work on "Open Innovation," the course emphasizes how to leverage both internal and external sources of ideas to accelerate growth. BIG BEN Training Center has developed this curriculum to bridge the critical gap between technical expertise and executive leadership, ensuring that your R&D function becomes a powerful engine for sustainable competitive advantage and long-term value creation. Participants will leave with a comprehensive framework for transforming their R&D departments into strategic assets that consistently deliver breakthrough results.

Target Audience / This training course is suitable for:

- Research & Development (R&D) Managers and Directors.
- Chief Technology Officers (CTOs) and Chief Innovation Officers (CIOs).
- Heads of Product Development and Engineering.
- Senior Scientists and Principal Engineers aspiring to leadership roles.
- Business Unit Managers with R&D oversight.
- Corporate Strategy and Business Development Professionals.
- Technology and Innovation Consultants.
- Project and Program Managers in technology-driven environments.
- Entrepreneurs and startup founders.

Target Sectors and Industries:

- Pharmaceuticals and Biotechnology.
- Information Technology and Software Development.
- Automotive and Aerospace Manufacturing.
- Telecommunications and Electronics.
- Chemicals and Advanced Materials.
- Energy and Utilities.
- Consumer Goods and Retail.
- Financial Technology (FinTech).
- Governmental research agencies and public sector innovation hubs.

Target Organizations Departments:

- Research & Development (R&D).
- Innovation Management.
- Product Management and Development.
- Engineering and Design.
- Strategic Planning.
- Business Development.
- Technology Transfer and Licensing.
- Intellectual Property (IP) Management.
- Corporate Venture Capital.

Course Offerings:

By the end of this course, the participants will have able to:

- Develop and implement a robust R&D strategy that is fully aligned with corporate objectives.
- Master techniques for building and sustaining a high-performance culture of innovation.
- Effectively manage an R&D project portfolio to balance risk and maximize return on investment.
- Implement frameworks for both incremental and disruptive innovation.
- Lead and motivate diverse teams of scientists, engineers, and creative professionals.
- Formulate and execute a comprehensive intellectual property (IP) strategy.
- Evaluate and integrate external technologies through open innovation models.
- Develop compelling business cases for R&D projects to secure funding and executive buy-in.
- Utilize key performance indicators (KPIs) and metrics to measure and communicate R&D effectiveness.
- Navigate the commercialization process to successfully bring innovations to market.

Course Methodology:

The training methodology at BIG BEN Training Center is designed for maximum engagement and practical application. This course rejects a purely theoretical, lecture-based approach in favor of a dynamic, interactive learning environment. Participants will engage in a blend of expert-led presentations, in-depth case study analyses of leading innovative companies, and collaborative group workshops. A significant portion of the course is dedicated to hands-on exercises, such as developing a technology roadmap, simulating R&D portfolio balancing decisions, and role-playing difficult leadership conversations with creative teams. We utilize a problem-based learning model where participants work in teams to tackle real-world R&D leadership challenges, fostering critical thinking and collaborative problem-solving skills. Peer-to-peer learning is highly encouraged through structured discussions and feedback sessions, allowing participants to benefit from the diverse experiences within the cohort. The facilitator will act as a guide, providing expert insights, personalized feedback, and ensuring that the theoretical concepts are directly linked to the practical realities and challenges faced by participants in their own organizations. This immersive approach ensures that learning is not just absorbed but is also retained and readily applicable in the workplace.

Course Agenda (Course Units):

Unit One The Strategic Role of R&D Leadership

- Defining the modern R&D leader.
- Aligning R&D strategy with overall business goals.
- The difference between leadership and management in an innovation context.
- Key leadership styles for creative and technical teams.
- Communicating the value of R&D to the C-Suite and stakeholders.
- Frameworks for technology and innovation strategy.
- Conducting a strategic R&D audit.

Unit Two Building the Innovation Engine

- Managing the innovation pipeline from ideation to execution.
- Techniques for effective brainstorming and idea generation.
- Implementing a robust stage-gate process for project evaluation.
- Introduction to R&D portfolio management.
- Balancing incremental, breakthrough, and disruptive innovation projects.
- Resource allocation and capacity planning for R&D teams.
- Metrics and KPIs for the early stages of innovation.

Unit Three Cultivating a High-Performance Innovation Culture

- The core components of a sustainable innovation culture.
- Recruiting, retaining, and motivating top R&D talent.
- Managing the inherent tension between creativity and discipline.
- Fostering psychological safety to encourage risk-taking.
- Designing physical and virtual workspaces for collaboration.
- Cross-functional team leadership for seamless product development.
- Conflict resolution and communication strategies for technical teams.

Unit Four The Commercialization of R&D

- Fundamentals of intellectual property (IP) for R&D leaders.
- Developing a proactive IP strategy (patents, trademarks, trade secrets).
- Understanding technology transfer and licensing agreements.
- Conducting market analysis and technology valuation.
- Building a compelling business case for R&D initiatives.
- R&D budgeting, financial forecasting, and ROI analysis.
- Navigating the path from prototype to market-ready product.

Unit Five Leading Future-Focused and Agile Innovation

- Introduction to strategic foresight and trend analysis.
- Principles of Open Innovation and external collaboration.
- Managing partnerships with universities, startups, and suppliers.
- Implementing Agile and Lean principles within R&D processes.
- Leading organizational change to adopt new technologies and processes.
- Ethical considerations in R&D and technological advancement.
- Developing a personal leadership action plan for driving innovation.

FAQ:

Qualifications required for registering to this course?

There are no requirements.

How long is each daily session, and what is the total number of training hours for the course?

This training course spans five days, with daily sessions ranging between 4 to 5 hours, including breaks and interactive activities, bringing the total duration to 20 - 25 training hours.

Something to think about:

How can an R&D leader effectively balance the pursuit of high-risk, disruptive innovations with the need for low-risk, incremental improvements to sustain current business operations?

What unique qualities does this course offer compared to other courses?

This course distinguishes itself by focusing intensely on the intersection of strategic leadership and technical innovation management, a nexus often overlooked by programs that treat R&D as a purely operational function. While other courses may concentrate on project management tools or innovation processes in isolation, our curriculum is built on the philosophy that a thriving R&D department is the direct result of visionary leadership. We delve deeply into the human and cultural elements of innovation, providing actionable strategies for motivating highly intelligent, creative professionals and for building a culture of psychological safety where experimentation can flourish. The program emphasizes strategic business acumen, equipping participants to articulate the value of R&D in the language of the boardroom, from ROI analysis to intellectual property strategy. Furthermore, the course content is dynamic, incorporating contemporary models like Open Innovation and Agile R&D, ensuring leaders are prepared not just for today's challenges but for the future of technological development. The practical application through complex, real-world case studies and peer-based problem-solving ensures that participants leave not with abstract theories, but with a refined leadership perspective and a toolkit ready for immediate implementation.
