Course Introduction / Overview:

This training course is designed to equip professionals with the knowledge and skills to master Environmental, Social, and Governance (ESG) reporting and analysis. In today's landscape, ESG factors are no longer a niche concern, they are central to investment decisions, corporate strategy, and long-term value creation. This program, offered by BIG BEN Training Center, provides a comprehensive framework for understanding and applying key ESG frameworks and standards, from data collection to stakeholder communication. We will explore how to identify, measure, and report on material ESG issues, ensuring compliance and enhancing corporate reputation. The curriculum is informed by the work of authors like Robert Eccles, whose books on integrated reporting and corporate transparency provide a foundational understanding of how to connect ESG performance with financial outcomes. This course goes beyond a simple checklist to provide a deep understanding of how to use ESG data as a strategic tool for risk management, innovation, and long-term value creation. We prepare participants to be leaders in a new kind of business world, one where success is measured by more than just profit.

Target Audience / This training course is suitable for:

- Sustainability and CSR professionals.
- Investor relations specialists.
- Financial analysts and portfolio managers.
- Corporate governance and compliance officers.
- Strategic planners.
- Public relations and communications managers.
- Auditors and accountants.

FAQ:

Qualifications required for registering to this course?

There are no requirements.

How long is each daily session, and what is the total number of training hours for the course?

This training course spans five days, with daily sessions ranging between 4 to 5 hours, including breaks and interactive activities, bringing the total duration to 20 - 25 training hours.

Something to think about:

How can organizations move beyond simply reporting on past performance and instead use ESG data as a forward-looking tool to drive innovation and create new value?

What unique qualities does this course offer compared to other courses?

This training course is unique because it provides a dedicated, strategic focus on the practical application of ESG reporting and analysis. While other programs may touch on sustainability, our curriculum is designed to empower professionals with the specific skills needed to master the entire ESG reporting lifecycle, from data collection to strategic analysis. The program is a hands-on experience, with exercises that directly simulate the challenges and decisions involved in a real-world ESG report. We go beyond theoretical concepts to provide a clear, actionable roadmap for using ESG data to build trust, manage risk, and create long-term business value. This course is for professionals who want to lead their organizations toward a more transparent and sustainable future.
